

**The Paris Brain Institute (ICM) is recruiting  
an Engineer  
3-year position starting March 2023**

*The Paris Brain Institute ICM is a private foundation recognized as being of public utility, whose purpose is fundamental and clinical research on the nervous system, located in the heart of the Salpêtrière Hospital in Paris. Eight hundred researchers, engineers, and physicians cover all the disciplines of neurology, intending to accelerate discoveries on brain function and the development of treatments for diseases such as Alzheimer's, Parkinson's, multiple sclerosis, epilepsy, depression, paraplegia, tetraplegia, etc.*

**POSITION**

Are you looking for excellent research opportunities at the forefront of Alzheimer's disease fluid biomarkers? The [Paris Brain Institute \(ICM\)](#) is seeking a highly motivated engineer in biochemistry, bio-engineering, molecular/cellular biology, neuroscience to join the team of Drs. Marie-Claude Potier and Stéphane Haïk ([Alzheimer's disease and prion diseases at ICM](#)) and work under the direct supervision of Professor Kaj Blennow (Gothenburg University, Sweden), who is also a visiting Professor at the ICM.

The three-year position will take place in a new group, focusing on developing new biomarkers for Alzheimer's disease and related conditions using advanced techniques such as second-generation immunoassays (SIMOA, MSD), mass spectrometry and protein misfolding amplification (RT-QuIC). Total funding is provided for three years by the [Fondation Recherche Alzheimer](#).

**KEY RESPONSIBILITIES**

- Develop and implement new biomarker assays for Alzheimer's disease and related conditions
- Utilize advanced techniques such as second-generation immunoassays, mass spectrometry, fully automated immunoassays and protein misfolding amplification (RT-QuIC).
- Collaborate with other members of the ICM and Professor Blennow's team in Gothenburg
- Communicate research findings through reports

## PROFILE

### KNOWLEDGE

- A Master in a relevant field such as biochemistry, bioengineering, or molecular/cellular biology
- Previous experience in a research laboratory and in the use of immunoassays
- Good French and English language skills
- Experience with data analyses
- Having trained as experimental animal user will be an advantage

### INTERPERSONAL SKILLS

- Ability to lead a project independently while having collaborative skills
- Strong collaboration and communication skills
- Rigorous and committed.
- You are passionate about the scientific environment.

The ICM is committed to diversity and equality in the workplace and encourages applications from underrepresented groups.

If you are interested in this exciting opportunity and meet the qualifications, please submit your CV, a cover letter outlining your research experience and motivation for the position, and two references' names and contact information.

**CV to be sent to: [recrutement@icm-institute.org](mailto:recrutement@icm-institute.org) indicating "an Engineer" and to [marie-claude.potier@icm-institute.org](mailto:marie-claude.potier@icm-institute.org)**
