The Move 2023

Corinne FORTIN

is the Secretary general of the Paris Brain Institute since 2018, after 6 years at the financial direction of the Pasteur institute. In the past, she had various legal and financial activities in various companies (General de Santé; LiveEvents). Through these multiple and diverse activities she developed wide open vision of the world and a taste for innovation, such as « The Move »

Pauline MAISANI

has been a hospital director for 25 years. She has spent her career in France and Quebec, working exclusively in university hospitals. Her managerial practice and her role as director are centered on the experience of patients and their caregivers. Pauline MAISANI is currently Director of the Pitié-Salpêtrière Hospital and Deputy Director General of the AP-HP Sorbonne University Hospital Group.

The Move 2023

Edwige Ponseel

Is the Dystonia Europe and France patients' organizations President. She is a working woman, wife and mother, family caregiver, dystonia advocate. Finally, she is a cervical dystonia patient enjoying several lives all at once.

Louise TYVAERT

is a Professor of neurology and a neurophysiologist at the university hospital of Nancy. She is an expert in epilepsy and the head of the department of functional neurology. Teaching has always been considered as an essential part of her function. She is, at this time, vice Dean of the medical school of Nancy and in charge of the entire medical educational program. She has been recently elected as vice president of the national college of teachers in neurology in order to promote the quality and dynamism of neurological teaching in France. More specifically, she develops and coordinates the educational programs in epilepsy promoted by the french league against epilepsy.

The Move 2023

Alexis Demas

Is a neurologist, particularly interested in neuro-psychiatric disorders in fictional characters. He is also passionate about sport, and is a concussion referent for professional soccer players (FFF) and a member of the French Anti-Doping Agency.

Magali Svrcek

Is a Professor of pathology at Sorbonne University and the vice-Dean for International Relations and Europe. She is also working as a pathologist at the Saint-Antoine Hospital (AP-HP).

The Move 2023

Anne Laure GUYOT

has been a student in a business school with an international curriculum, especially in Slovenia, China and Germany. She then had various experiences in start-ups. She is currently working in Paris for a company in the food sector. In parallel, she is strongly involved in fighting food waste. She is a member of the board of the Hippocrène Foundation since 2021.

Céline Louapre

is an associate professor of neurology at Sorbonne University in Paris, in charge of neurological semiology teaching for 2nd year medical students. She has accompanied “The Move” at Sorbonne University since 2016. As a neurologist and a researcher in neurosciences, she is an expert in multiple sclerosis, fostering development of remyelination biomarkers and translational research to improve remyelination in patients with multiple sclerosis. She is leading the Neuroscience Clinical Investigation Center at the Paris Brain Institute.

The Move 2023

Tamara Pringsheim

is a Professor of Neurology at the University of Calgary in Alberta, Canada. She is the program leader for the Tourette and Pediatric Movement Disorders Clinic and performs clinical research in Tourette syndrome, neurodevelopmental disorders and mental health conditions.

Cosmin ALECU

Is a neurologist in the Movement Disorders Center of the University Hospital of Nice (France)

The Move 2023

Emilie Lommers

is an Associate Professor, neurologist and MS expert in the neurology Department of CHU Liege, Belgium. She is involved in clinical research with a particular interest in developing imaging biomarkers of multiple sclerosis progression. She also gives lectures for students in Uliege (pharmacy and medicine students).

Bram Jacobs

works as a neurologist at the University Medical Center Groningen in the Netherlands. His area of expertise is acute neurology and especially neurotraumatology. Furthermore, he is deputy manager of the postgraduate neurology training program of the same institution. He teaches clinical neurology to bachelor and master students at the University of Groningen as well.

The Move 2023

Salome PUISIEUX

Is a movement disorders expert. For the last 2 years, she has been working as a chief resident in the department of neurology at the University Hospital of Nancy. At the same time, she is pursuing a PhD on Huntington's disease.
