

The Paris Brain Institute (ICM) is recruiting

A Medical Monitor (M/F)
Position to be filled as soon as possible.

Permanent position

Paris 13^{ème}

The Paris Brain Institute is a private foundation recognized as being of public interest, dedicated to fundamental and clinical research on the nervous system. On a single site, 800 researchers, engineers and doctors cover the full range of neurological disciplines, with the aim of accelerating discoveries about how the brain works, and the development of treatments for diseases such as Alzheimer's, Parkinson's, multiple sclerosis, epilepsy, depression, paraplegia, tetraplegia and others.

The Neurotrials unit is an early-stage clinical research unit within the ICM for the design, management and execution of phase Ib/Ia clinical trials in drug development or in the field of medical devices.
